SUMMARY

Full-Stack Developer with a Bachelor's Degree in Biochemistry and a passion for Software Development. A recent Dean's List graduate from the California State University of Fullerton. I enjoyed working with technology as a biochemistry student, therefore I also learned software development during my undergrad. Biochemistry provides the mathematical and scientific knowledge that carries over to the field of coding and opened my eyes to the importance of technology. After graduating from CSUF, I attended the University of California, Irvine's Coding Bootcamp where I gained professional training in Full-Stack Development. I am highly creative with problem-solving and excel in group communication to reach solutions. Software development has given me the ability to create solutions for myself and others, which is the most rewarding aspect.
